## Contents

Aho, J., Ranta, E. & Vuorinen, J.: Species composition of freshwater snail communities in lakes of southern and western Finland .....	233—241
Alatalo, R. V.: Habitat selection of forest birds in the seasonal environment of Finland .....	103—114
Gyllenberg, G.: Ingestion and turnover of oil and petroleum hydrocarbons by two planctonic copepods in the Gulf of Finland .....	225—228
Gyllenberg, G.: Eudiaptomus gracilis (Copepoda, Calanoida): diel vertical migration in the field and diel oxygen consumption rhythm in the laboratory .....	229—232
Hippa, H. & Oksala, I.: Polymorphism and reproductive strategies of <i>Enoplognatha ovata</i> (Clerck) (Araneae, Theridiidae) in northern Europe .....	179—190
Kansanen, P. H.: Effects of heavy pollution on the zoobenthos in Lake Vanajavesi, southern Finland, with special reference to the meiozoobenthos .....	243—251
Kansanen, P. H. & Aho, J.: Changes in the macrozoobenthos associations of polluted Lake Vanajavesi, Southern Finland, over a period of 50 years .....	73—101
Karling, T. G.: <i>Typhlorhynchus nanus</i> Laidlaw, a kalyptorhynch turbellarian without proboscis (Platyhelminthes) .....	169—177
Korhonen, K.: Temperature in the nocturnal shelters of the redpoll ( <i>Acanthis flammea</i> L.) and the Siberian tit ( <i>Parus cinctus</i> Budd.) in winter .....	165—168
Kristiansson, H.: Distribution of the European hedgehog ( <i>Erinaceus europaeus</i> L.) in Sweden and Finland .....	115—119
Pajunen, I.: Effect of long laboratory rearing on the hibernation pattern in the garden dormouse, <i>Eliomys quercinus</i> .....	129—132
Pajunen V. I.: Analysis of developmental rates in field populations of <i>Arctocoris carinata</i> (Sahlb.) and <i>Callicoris producta</i> (Reut.) (Hemiptera, Corixidae) with the aid of developmental time axes .....	191—197
Palmgren, P.: The mechanism of the extrinsic coxal muscles of spiders .....	203—207
Pankakoski, E.: Actinomycosis-like lesions in skulls of Finnish muskrats, <i>Ondatra zibethica</i> (L.) .....	209—212
Pulliainen, E.: A transect survey of small land carnivore and red fox populations on a subarctic fell in Finnish Forest Lapland over 13 winters .....	270—278
Pulliainen, E. & Iivanainen, J.: Winter nutrition of the willow grouse ( <i>Lagopus lagopus</i> L.) in the extreme north of Finland .....	263—269
Räisänen, P., Timola, O. & Valtonen, T.: A new corer for sampling sand and moraine bottom meiofauna .....	133—137

Seppänen, R.: Differences in spotting pattern between populations of <i>Aphantopus hyperantus</i> (Lepidoptera, Satyridae) in southern Finland .....	1—36
Sjöberg, K. & Danell, K.: Food availability and utilization by ducks of a shallow brackish-water bay in the northern Bothnian Bay .....	253—261
Sunila, I.: Reproduction of <i>Mytilus edulis</i> L. (Bivalvia) in a brackish water area, the Gulf of Finland .....	121—128
Sunila, I.: Toxicity of copper and cadmium to <i>Mytilus edulis</i> L. (Bivalvia) in brackish water .....	213—223
Terhivuo, J.: Provisional atlas and population status of the Finnish amphibian and reptile species with reference to their ranges in northern Europe .....	139—164
Väisänen, R.: Is there more than one successional phase in the mycetophilid (Diptera) community feeding on a mushroom? ...	199—201
Werdelin, L.: The evolution of lynxes .....	37—71
